About us

Pool Pro&Lab has been in swimming pool business for 21 years during which we have built more than 15,000 pools in Thailand. We are the first company in Thailand to export swimming pools, and now we export a wide variety of products to more than 20 countries. Now, we have 20 showrooms around the country.

Now, a lot more construction projects include swimming pools, which mean post construction maintenance service will be required. Therefore, we provide maintenance service to ensure that all swimming pools will remain in healthy and good working conditions. We have many service centers and teams of experts in pool construction, installation and maintenance that are fully equipped to offer all types of services to our customers.

Because you never know what lies beneath the **sparkling blue water** in your swimming pool...

Did you know ? When you take a swim in your pool this may cause a risk for health issue such as Damaged hair, Skin problems and Pink eyes. Because of your pool water may not good enough quality.

Pool Water Testing Lab

Because your pools needs delicate care Pool Water Check Up program checking 11 parameter of the water chemical balance and evaluate whether your swimming pool is in the ideal condition to a swim in or not by computerized water analysis Lab The first laboratory in ASEAN

Easy way to get the water test

Easy way to get the water test

Customer: 01-1080 91
Address: Jember
131 Soe 04, Pustakomah
Lampung, Bangkai 10110

Chem Brand: IQ (pool)
Surface: Chrome Chlorine
Stock: IQ 3000 (CHLORIN 700) Chemical P
Salt Generation: Salt Chlorinator 4000-5000
Chemical: None
All: Sandstone
Volume: 2100 Liter
Surface Type: Vinyl
Filter: Cartridge
Pool Type: Indoor
Weather: None
Temperature: 28 °C

Test Results

Test Name	Test Results	Recommended Range
Total Chlorine	0.42 ppm	1.0 - 4.0 ppm
Free Chlorine	0.10 ppm	1.0 - 4.0 ppm
Combined Chlorine	0 ppm	0.1 - 0.5 ppm
pH	7.00	7.2 - 7.6
Hardness	200 ppm	100 - 300 ppm
Calcium	90 ppm	100 - 150 ppm
Carbonic Acid	0 ppm	50 - 70 ppm
Copper	0.1 ppm	0.1 ppm
Iron	0.1 ppm	0.1 ppm
Phosphate	0.1 ppm	0.1 - 2.00 ppm
Salinity	0 ppm	3000 - 3500 ppm

Water Treatment Recommendations

INTENTION: For your safety, never mix different pool treatments (chemicals) together before adding them to your pool.
It is recommended that dry chemicals be mixed into water in buckets of about ONE GALLON, and use the pre-mixed mixture to distribute evenly around the pool unless directed otherwise. It is best to circulate the water when adding chemicals to your pool. Be sure to follow all instructions found on the manufacturer's product label.

Follow steps below in the order shown:

- Filter operation is OK.
- Copper concentration is OK.
- Alkalinity level is low.
- Add 11.31 kg (25 lb 12.5 oz) **IC ALKALINITY UP**.
- Distribute recommended dose in bucket of cool water. Distribute about the surface of the pool with filter running for 4-8 hours. **DO NOT** add more than 1kg of it after in any 12 hour period.
- Hardness level is OK.
- Sanitizer is low.

For more information visit us on: Add IC 2000 & 3000 for Pool & Spa at a rate of 100gms per 10,000 liter. With this you receive 1kg in box. Add IC 2000 & 3000 for Pool & Spa at a rate of 100gms per 10,000 liter. With this you receive 1kg in box.
